

AGENDA
Governor's Broadband Development Council

June 14, 2022
2 PM

VIDEOCONFERENCE MEETING

Governor's Broadband Development Council (" Council ") members will be meeting via videoconference. Members of the public who would like to attend the meeting may join by videoconference using the following information:

Free Web Link for Videoconference:

https://teams.microsoft.com/l/meetup-join/19%3ameeting_MGQ1ZGFIMDMtMzY3MS00NzcyLWlyYjktMjlyZDVkZTUzZDc5%40thread.v2/0?content=%7b%22id%22%3a%2254cb5da6-c734-4242-bbc2-5c947e85fb2c%22%2c%22oid%22%3a%22d6aadcd4-dfe0-4517-a4db-c234b7399845%22%7d

Members of the public attending the meeting via the videoconference information provided will be able to hear audio of the meeting and can provide comments during the Public Comment portion of the meeting. The Council will also record the meeting, which will be made available to members of the public.

All agenda items are subject to possible discussion, questions, consideration, and action by the Council. Agenda item numbers are assigned for ease of reference only and do not necessarily reflect the order of their consideration by the Council. Presentations may be made by the identified staff or Council member or others as needed.

ITEM

I. Call to Order

II. Chair Welcome, Remarks and Roll Call

III. Council Member Updates

IV. Discussion and Possible Action on Approval of Minutes from the Council meeting on April 29, 2022 (Draft available at <https://gov.texas.gov/business/page/governors-broadband-development-council>)

V. Comments by Russ Hanser, Director of Communications Policy Initiatives, National Telecommunications and Information Administration (NTIA), providing information relating to the NTIA's Broadband Equity, Access, and Deployment Program; Enabling Middle Mile Broadband Infrastructure Program and Digital Equity Program; their respective Notice of Funding Opportunity; and Council review, discussion, consideration and/or possible action regarding same (Slide available in Tab 1)

VI. Comments by Greg Conte, Director of The Texas Broadband Development Office, Texas Comptroller of Public Accounts, providing an update from his office and Council review, discussion, consideration and/or possible action regarding same

VII. Discussion and update regarding Council procedures going forward (including status of Council roster and posting of meeting recordings)

VIII. Discussion of the 2022 electronic report due to the governor, the lieutenant governor, and the members of the legislature from the Council under Section 490H.007 of the Texas Government Code

IX. Review, Discussion, Consideration and/or Possible Action on Council Next Steps for Following Meeting(s)

X. Comments Without Deliberation

Public comment may be received on any matter under the Council's jurisdiction without regard to whether the item was posted on the agenda

XI. Adjournment

Persons with disabilities who plan to attend this meeting, who may need auxiliary aids or services, or who need assistance in having English translated into Spanish, should contact Sonia Gaillard at 512-463-2981 at least 2 days before the meeting so that appropriate arrangements can be made.

Personas con discapacidades que asistirán a esta reunión y requieren servicios o instrumentos especiales, o necesitaran traducción al español, por favor de comunicarse con Sonia Gaillard al 512- 463-2981 por lo menos 2 días antes de la reunión para hacer los arreglos necesarios.

INTERNET FOR ALL

FUNDED BY THE BIPARTISAN INFRASTRUCTURE LAW
ADMINISTERED BY THE DEPARTMENT OF COMMERCE'S NATIONAL
TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

JUNE 2022

"We'll make sure every single, every single, American has access to high-quality, affordable, high-speed Internet," Biden said during his speech. "When I say affordable, I mean it. Americans pay too much for Internet service. We're going to drive down the price for families who have service now and make it easier for families who don't have affordable service to be able to get it now."

-PRESIDENT JOE BIDEN

The Bipartisan Infrastructure Law is a once-in-a-generation investment in infrastructure and competitiveness

Bipartisan Infrastructure Law

- \$1.2T bill passed by Congress and signed into law by President Biden on November 15, 2021
- Largest ever investments in high-speed Internet, rail and transit, clean energy, and water
- Allocated funding to over 350 distinct programs across more than a dozen federal departments and agencies

This historic legislation will:

- Deliver clean water to all families and eliminate the nation's lead service lines
- Ensure every American has access to affordable, reliable, high-speed Internet
- Repair and rebuild roads and bridges
- Improve transportation options and reduce greenhouse emissions
- Upgrade our nation's airports and ports to strengthen our supply chains
- Make the largest investment in passenger rail since Amtrak's creation
- Build a national network of electric vehicle chargers
- Upgrade power infrastructure to deliver clean, reliable energy
- Make infrastructure resilient against the impacts of climate change, cyber-attacks, and extreme weather events
- Deliver the largest investment in tackling legacy pollution in US history

Please see [Build.gov](https://www.build.gov) for more details on the Bipartisan Infrastructure Law

The Bipartisan Infrastructure Law invests ~\$65B to ensure everyone in America has access to high-speed Internet

Goal is to build infrastructure that provides reliable high-speed Internet access to all Americans for today and tomorrow...

...with a focus on making high-speed Internet affordable and reliable so everyone can participate in the economy...

... and providing the resources needed to equitably expand the adoption and use of the Internet so everyone can experience the benefits.

Bipartisan Infrastructure Act invests roughly \$65B into high-speed Internet efforts through 7 federal programs:

Administered by NTIA

- Broadband Equity, Access, and Deployment (BEAD) Program (\$42.45B)
- Digital Equity Planning, Capacity and Competitive Grants (\$2.75B)
- Tribal Broadband Connectivity Program (\$2.00B)
- Middle Mile Broadband Infrastructure Program (\$1.0B)

Administered by other federal agencies

- Affordable Connectivity Program (\$14.2B)
- Rural Broadband Programs at the Department of Agriculture (\$2.0B)
- Private Activity Bonds (\$0.6B)

High-speed Internet helps individuals and our country

These are some of the ways that high-speed Internet has transformed our world:

Maximizing savings for education

The Internet is not a luxury, it's a necessity. Students are asked to utilize Internet to complete homework assignments, do research, apply to college or trade schools. Students who don't have access in their home are left out and left behind.

Stimulating growth in the economy

By connecting the workplace, we can better connect businesses to consumers. And new markets can increase sales and create jobs. High-speed Internet helps American businesses compete for talent and business in the global marketplace.

Lowering costs for health

Telehealth reduces hospital visits and cuts down hospital stay time. Hospitals with high-speed Internet save money because they have lower administration costs. And by offering telehealth, they save money while improving patient health.

Strengthening ties in our community

High-speed Internet connects us to services we need. It helps first responders save lives. It lets us connect with our elected officials. And it strengthens our ties to our neighbors. One in four Americans get online alerts about local issues. And one in five use digital tools to stay in touch with their community.

Affordable, reliable, high-speed Internet has remained elusive for too long

The "digital divide" refers to the gap between those who have access to high-speed Internet and those who have limited or no access, driven by three key barriers

Access

Many Americans live in areas that are not covered by high-speed Internet service providers or where service is not reliable

Affordability

Many American households cannot afford to pay for the costs of devices or monthly service

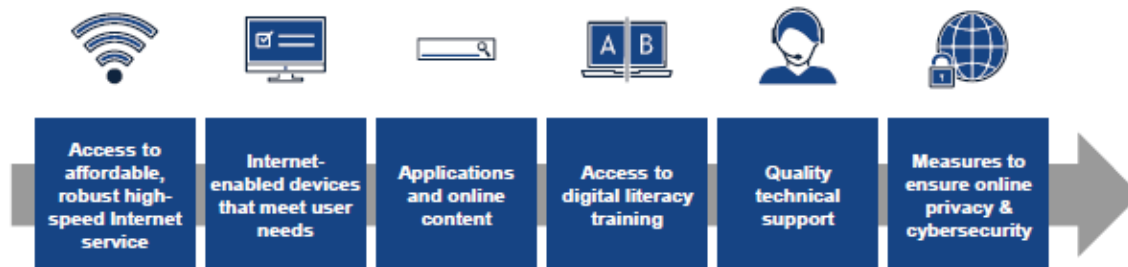

Adoption and Digital Literacy

Many Americans are not aware of available service offers or lack the digital skills to participate online

This gap is particularly acute for communities of color, Tribal nations, lower-income areas, and both urban and rural communities

Americans require a range of Internet tools and services to maximize the benefits of high-speed Internet access

High-speed Internet is important for full participation in the modern world

Why do we need Internet?

- Too many Americans have been left out or left behind because they do not have access to affordable, reliable high-speed Internet
- Access to Internet plays a critical and growing role in the ways in which Americans work, play, learn, receive healthcare, participate in democracy, and more

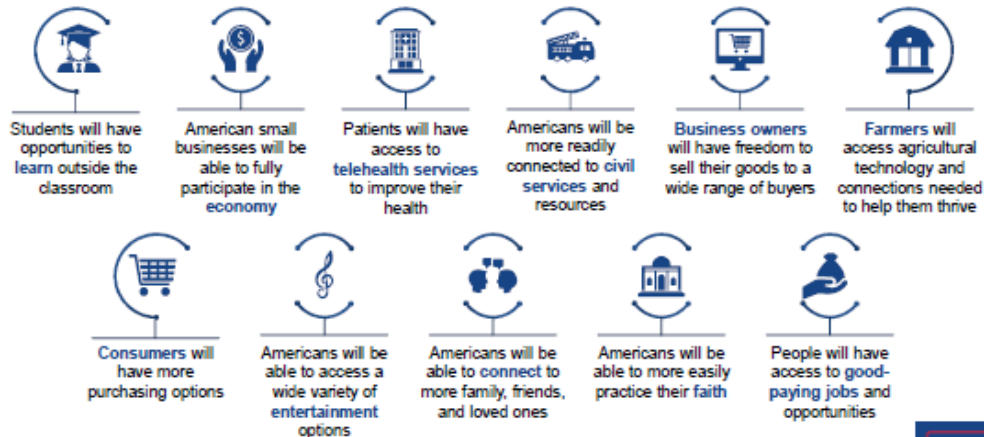

Why do we need it to be fast?

- Internet speeds are measured by how much data a connection can transfer per second
- Data goes in two directions, so every Internet connection will have download and upload speeds
- Downloading or uploading large files with low network speed may take significant time
- Quality of connection may impact speed of delivery for telemedicine or remote learning

What is broadband?

- "Broadband" refers to always on, high-speed Internet that is faster than traditional dial-up
- It may use a variety of technologies: fiber-optic, Cable Modem/Hybrid fiber-coaxial, digital subscriber line (DSL), or terrestrial fixed wireless
- Federal Communications Commission defines broadband Internet as having download speeds of 25 megabits per second (Mbps) and upload speeds of 3 Mbps

High-speed Internet gives people freedom to live, work, and learn what they want, when they want

NTIA will administer ~\$48B through four programs that drive high-speed Internet access, affordability, and adoption

NTIA will administer ~\$48B of funding from the Bipartisan Infrastructure Law				FCC to administer \$14.2B
BEAD	DIGITAL EQUITY	TRIBAL	MIDDLE MILE	For Affordable Connectivity Program, which replaced the EBB program
\$42.45B	\$2.75B	\$2.00B	\$1.00B	USDA to administer \$2.0B Via the Rural Utilities Service
Broadband Equity, Access & Deployment Program	Digital Equity Act	Tribal Connectivity Technical Amendments	Enabling Middle Mile Broadband Infrastructure	Private Activity Bonds \$0.6B
A program to get all Americans online by funding partnerships between states or territories, communities, and stakeholders to build infrastructure where we need it to and increase adoption of high-speed Internet.	Three programs that provide funding to promote digital inclusion and advance equity for all. They aim to ensure that all communities can access and use affordable, reliable high-speed Internet to meet their needs and improve their lives.	A program to help tribal communities expand high-speed Internet access and adoption on tribal lands.	A program to expand middle mile infrastructure, to reduce the cost of connecting unserved and underserved areas.	Authorizes State and local governments to use private activity bonds for rural broadband

BEAD program will provide ~\$42.45B for infrastructure planning and implementation

Funding pool
\$42.45B

A program to get all Americans online by funding partnerships between states or territories, communities, and stakeholders to build infrastructure where we need it to and increase adoption of high-speed Internet.

PROGRAM HIGHLIGHTS

Entities eligible to apply for this program include:

- All 50 States
- The District of Columbia and Puerto Rico
- Other Territories: U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands

Example eligible uses of funds include:

- Planning for deployment of Internet
- Deploying or upgrading Internet
- Installing Internet in multi-tenant buildings
- Implementing adoption and digital equity programs
- Workforce and job training

ESTIMATED TIMELINE

Timeline approximate unless exact date specified

11

Digital Equity Act created three programs to promote digital equity and inclusion

Funding pool
\$2.75B

Three programs that provide funding to promote digital inclusion and advance equity for all. They aim to ensure that all communities can access and use affordable, reliable high-speed Internet to meet their needs and improve their lives.

PROGRAMS HIGHLIGHTS

The Digital Equity Act created three programs:

- State Planning**
 - \$60M formula funding program to develop digital equity plans
- State Capacity**
 - \$1.44B formula funding program to implement plans & promote digital inclusion
- Competitive**
 - \$1.25B to implement digital equity and inclusion activities

Example eligible uses of funds include:

- Developing digital equity plans; states must develop a plan to be eligible for state capacity grants
- Making awards to other entities to help make digital equity plans
- Improving accessibility and inclusivity of public resources
- Implementing digital equity plans and related activities
- Providing digital literacy and digital skills education
- Facilitating the adoption of high-speed Internet

ESTIMATED TIMELINE

Timeline approximate unless exact date specified

Technical amendments and new funding will strengthen current Tribal Broadband Connectivity Program

**Funding pool
\$2.00B**

A program to help tribal communities expand high-speed Internet access and adoption on tribal lands.

PROGRAM HIGHLIGHTS

New funding will be used for additional new grants and to fully fund grants from first round of awards

Amendments to original program:

- Relaxes time requirements of original program
- Allows infrastructure grantees to spend up to 2.5% of the total project cost for related planning, feasibility and sustainability studies
- Preserves unused allocated funds for other Tribal broadband projects instead of reverting to the Treasury

ESTIMATED TIMELINE

Timeline approximate unless exact date specified

13

Middle Mile Grant Program will invest in the construction, improvement or acquisition of middle mile infrastructure

**Funding pool
\$1.00B**

A program to expand middle mile infrastructure, to reduce the cost of connecting unserved and underserved areas.

PROGRAM HIGHLIGHTS

Middle mile infrastructure refers to the mid-section of Internet infrastructure that carries large amounts of data at high speeds over long distances and connects the "backbone" of Internet infrastructure to the "last mile", which connects to end users

Entities eligible to apply include a wide variety of entities, incl. but not limited to government entities, utilities, companies, and non-profits that provide Internet services

Example uses of funds:

- Construction, improvement or acquisition of facilities and equipment
- Engineering design, permitting and work related to projects
- Personnel costs, including salaries and benefits
- Other costs necessary to program's activities

ESTIMATED TIMELINE

Timeline approximate unless exact date specified

14

There are many ways stakeholders may get involved in the programs

Illustrative, non-exhaustive

Telecom provider

- Apply to be a BEAD subgrantee or apply directly for Middle Mile
- Note: Telecom providers may include government owned entities

Community anchor institution

- Benefit from BEAD funding for faster Internet
- Apply for Digital Equity competitive grant
- Advocate for community interests across programs

Community orgs

- Serve as a thought partner as states design their outreach strategies
- Advocate for community interests across programs

Tribal government

- Coordinate, consult, and partner with states during BEAD planning
- Apply for a Middle Mile, Tribal Broadband, or Digital Equity capacity and competitive grants

Local government

- Collaborate with state to develop Digital Equity plan and during BEAD planning
- Apply for a Middle Mile or Digital Equity capacity and competitive grants

Individual

- Participate in digital skill and literacy courses funded by programs
- Contact local reps for more information

Additional resources about the programs

- 1 Visit the [InternetForAll.gov](https://www.InternetForAll.gov) for additional information on federal funding programs
- 2 Engage with your State or territory regarding their plans to improve high-speed Internet access
- 3 Submit questions to InternetForAll@ntia.gov
- 4 Attend future NTIA webinars, including program-specific application guidance webinars for applicants

-END
