Executive Summary

People who are DeafBlind are valued members of society, ready to contribute to and participate in their communities, but they face many challenges that can make their participation extremely difficult. Barriers exist in their day-to-day routines and activities, such as raising a family, attending community events, managing and maintaining a household, running errands like grocery shopping, participating in workplace activities, getting medical care and maintaining a healthy lifestyle, and many more. Texas does not currently meet the support needs of people who are DeafBlind. Support Service Providers (SSPs), also called CoNavigators (CNs), can provide services to overcome these barriers. SSPs/CNs are one vital tool available for people who are DeafBlind and provide support and information for them to lead independent, productive, and quality lives. Based on research from states that already provide SSP/CN services, the Texas Governor’s Committee on People with Disabilities (GCPD) estimates that approximately five percent of the Texas DeafBlind population will use these services.¹

An SSP/CN is an individual trained to act as a link between persons who are DeafBlind and their environment. They typically work with a single individual and serve as a guide and communication facilitator, relaying visual and environmental information. Although advocates have worked towards a paid program for over a decade, Texas does not currently have an SSP/CN program. This leads to the use of untrained volunteer SSPs/CNs, increasing the risk of safety issues, lack of reliability, isolation, and unhealthy reliance on family members and friends.

Establishing services throughout Texas would significantly and positively impact the lives of people who are DeafBlind by providing formalized SSP/CN services, enabling them to lead lives of greater independence and self-determination. This is especially true in small and rural communities with very limited services, including no means of transportation. GCPD recommends the 87th Texas Legislature establish an SSP/CN program to serve Texans who are DeafBlind.

¹ See Appendix C for research methodology.
Background

People who are DeafBlind⁴ face challenges in all aspects of their lives. Tasks like grocery shopping, maintaining a home, reading mail, and getting an education can be difficult for someone who has hearing and vision limitations. The support offered by trained SSPs/CNs is one valuable tool to help people who are DeafBlind overcome these barriers. Members of the American Association of the DeafBlind (AADB), a national organization by and for people with combined vision and hearing loss, in 2010 voted SSP/CN services as the number one need for their community.³

Advocates continue to work towards establishing an SSP/CN program in Texas. The DeafBlind Coalition of Texas (formerly called the SSP Bill Coalition), a group of advocates from across Texas, has been working to establish an SSP/CN program in the state for over a decade. Advocates from the Texas Association of the Deaf (TAD) have expressed concerns about the lack of support available to Texans who are DeafBlind, and in August 2020 TAD adopted the establishment of an SSP/CN program as one of their top policy priorities for the 87th Legislature. GCPD voted unanimously to recommend the establishment of an SSP/CN program to the 85th and 86th Legislatures. Bills were filed in both the 85th and 86th Legislative Sessions to establish the program; however, they were not passed. GCPD has reaffirmed this recommendation for the 87th Legislature.

Definition of DeafBlindness

According to HHSC, “DeafBlindness” is a chronic condition in which a person:

a) has deafness, which is a hearing impairment severe enough that most speech cannot be understood with amplification; and

b) has legal blindness, which results from a central visual acuity of 20/200 or less in the person’s better eye, with correction, or a visual field of 20 degrees or less.

In other words, DeafBlindness is a combination of sight and hearing loss that not only affects a person’s ability to communicate or access information, but may also require significant adaptive strategies in order for the individual to

---

⁴ DeafBlind is the spelling adopted by the American Association of the DeafBlind (AADB) to reflect the dual disability of hearing and vision loss for the cultural community of the DeafBlind.

maintain independence. DeafBlindness is a diverse condition that encompasses a wide array of sensory impairments, and may include the presence of other disabilities. Additionally, the age of onset for vision and hearing loss can vary; they do not have to occur concurrently. According to the Helen Keller National Center (HKNC), approximately 70,000 people in the United States are DeafBlind. In Texas, the estimated DeafBlind population over the age of 18 is 2,446.4

Research Summary on SSPs/CNs

SSPs/CNs are specially trained professionals who provide individuals who are DeafBlind with visual and environmental information, sighted guide services, and communication accessibility. Texas does not currently have a mechanism to fund SSP/CN services, meaning the people who provide these services are generally working as unpaid volunteers. This lack of funding leads to an unsustainable service model, often resulting in unskilled volunteers, and denies DeafBlind people of their privacy, autonomy, and access.

Data collected by the HKNC in May 2020 on SSP/CN programs from across the country shows the following:5

- A total of 30 states have an active SSP/CN program providing services either statewide or in specific local metropolitan areas;
- SSP/CN services are funded primarily either through grants and donations, on a temporary basis through vocational rehabilitation programs run by the state, or through state appropriation;
- The number of people served per year by each state varies from five to 100;
- SSP/CN services were most commonly requested for grocery shopping, running errands, reading mail, attending community events, employment-related tasks, attending appointments, and transportation to events;
- About half of the states allow for SSPs/CNs to provide transportation as part of the service;
- The number of service hours provided per month varies tremendously, with some states providing five hours and some providing as many as 80; and

---

5 For a detailed list of SSP/CN programs, see Appendix D.
● Nearby states, including Louisiana, Arkansas, and Arizona, have funded paid SSP/CN services, while other states rely on volunteers, though several are actively seeking ongoing funding.

GCPD surveyed the DeafBlind community of Texas with the goal of better understanding their lived experience and service needs. A total of 62 individuals responded, providing the following insights:

● People who are DeafBlind live all over the state.
● People who are DeafBlind use English, American Sign Language (ASL), protactile sign language, and Spanish to communicate;
  o 80 percent identified English as their primary language, 40 percent identified ASL, 7.5 percent protactile sign language, and 5 percent Spanish. Individuals were able to select multiple languages; therefore, the sum of the percentages is greater than 100.
● The SSP/CN services identified as most needed were grocery shopping, attending community and workplace events, and traveling through the community; and
● Because Texas does not have an SSP/CN program, the survey asked how individuals are receiving services currently. Respondents identified various informal networks of support or stated they do not receive any services at all.

How do SSPs/CNs differ from Interveners?

Interveners are a different type of service provider than SSPs/CNs; and unlike SSPs/CNs, they are trained to provide education and direct care to achieve functional daily living to individuals who are DeafBlind and who may have additional developmental disabilities. Individuals who use Interveners often rely on life-long parental or guardianship support, and do not have the same level of autonomy in decision-making and community involvement as do individuals served by SSPs/CNs.⁷

According to Texas Administrative Code (TAC) §42.103, an Intervener is:

A service provider with specialized training and skills in deafblindness who, working with one individual at a time, serves as a facilitator to involve an individual in home and community

---

⁶ Protactile sign language is sign language developed by and for people who are DeafBlind based on touch.
⁷ See Appendix B for an illustration of the differences between SSP/CNs and Interveners.
services and activities, and who is classified as an "Intervener", "Intervener I", "Intervener II", or "Intervener III" in accordance with Texas Government Code, §531.0973.

The Intervener works intimately with people of all ages who are DeafBlind to understand their needs and help them connect with the broader community. The role of the Intervener is to provide specific intervention in three areas: access to information, access to communication, and access to social and emotional development. Interveners primarily serve in educational settings. The Intervener’s personal connection with a person who is DeafBlind reduces the sense of isolation and helps build a bond of trust. The Intervener may be the one person in the individual’s life who can help them interact with others, express preferences, make choices, solve problems, and develop self-esteem. Additionally, an Intervener is a paid position with a defined occupational career ladder.

An SSP/CN generally acts as a sighted guide and communication facilitator, and has a less intimate relationship with the individual than an Intervener. According to AADB:

An important aspect of the relationship between the person who is DeafBlind and an SSP/CN is that the former makes all decisions [...] The professional SSP/CN strives to be helpful but objective, supportive yet empowering, and sparing in expressing their personal preferences while providing services.

Services provided by SSPs/CNs include transportation to the store, communication in a social setting, serving as a human guide while walking, etc. Many SSPs/CNs are themselves deaf, and paid SSP/CN positions could create employment opportunities for the Deaf community. Hayley Broadway of the DeafBlind Coalition of Texas offers the following insights. 8

SSPs/CNs can:

- Serve as a guide when escorting a person to or from a meeting room, a restroom, an unfamiliar building, through a lunch line, or when attending appointments and conducting business;
- Provide visual and environmental information, which can take several forms: describing the activity, mood, or people in a room; reading the menu and relaying that information; or co-navigating together to find desired or needed items in a store or other locations; and

8 See Appendix B for an illustration of the differences between SSPs/CNs and Interveners.
• Provide support to persons who are DeafBlind in their homes, at their place of employment, in their community, or elsewhere, such as sight-reading mail, bills, locating expiration dates on food items, and more.

SSPs/CNs do not:
• Provide personal care (e.g. bathing and grooming);
• Run errands alone for the person who is DeafBlind;
• Make decisions for the person who is DeafBlind;
• Teach or instruct; and
• Interpret in medical, legal, business, or similar settings.

Medicaid and the DBMD Waiver

The HHSC Deaf-Blind Multiple Disabilities (DBMD) Waiver program “provides home and community-based services to people who are deaf-blind with multiple disabilities as a cost-effective alternative to institutional placement. The program focuses on increasing opportunities for consumers to communicate and interact with their environment.”

The program provides services that enhance, rather than replace, existing supports and resources for individuals. Services include residential habilitation, respite, Intervener, supported employment, employment assistance, and support consultation. To qualify for the DBMD Waiver, an individual needs to be DeafBlind and have an additional disability, such as an intellectual disability. The diagnosis of the related condition has to occur before age 22, and the individual must meet the income eligibility criteria, meaning they have a monthly income no greater than 300 percent of the federal poverty level.

Individuals receiving services through this program are provided Intervener services. In addition to the DBMD Waiver, people who are DeafBlind and who may have an additional disability may be eligible to receive services through other Medicaid programs. Both the Community Living Assistance and Support Services (CLASS) and Home and Community-Based Services (HCS) waivers may provide Intervener services. However, no Texas Medicaid waiver program provides or reimburses for SSP/CN services. The waiver programs require an individual have an additional disability, usually an intellectual or

developmental disability, to qualify, which exclude the DeafBlind population from being served by SSP/CN services.

**Policy Recommendations**

The State of Texas would significantly impact the lives of people who are DeafBlind by providing formalized SSP/CN services, enabling them to lead lives of greater independence and self-determination. This is especially true in small and rural communities with very limited services. GCPD proposes the 87th Legislature implement the following recommendations:

1. Establish a formalized SSP/CN program within HHSC, including training for providers. This will ensure services are provided in a standard, consistent manner.

2. Establish the following eligibility criteria for the program:
   a. Individuals who meet the definition of DeafBlind as defined by HHSC.
   b. Individuals who meet the income guidelines of a monthly income not greater than 300 percent of the federal poverty level, matching the financial criteria required for the DBMD Waiver.

3. Establish a pay rate for SSP/CN providers by rule. Pay should be based on SSP-level training requirements and ASL fluency. GCPD recommends a starting wage of $20 per hour based on the national average.\(^{11}\) This is comparable to the 2019-2020 State of Texas Salary Schedule for an Interpreter I position.\(^{12}\)

4. Establish a voucher program to pay for SSP/CN services administered by HHSC. The Specialized Telecommunications Assistance Program (STAP) may serve as a model.

5. Appropriate ongoing funding for the SSP/CN program.

6. Establish an initial proposed annual budget of $584,400. This cost is derived as follows:
   a. Estimated maximum number of hours per month for services to one individual (e.g. grocery shopping, attendance at a community event):

---

\(^{11}\) See Appendix D for active national SSP/CN programs.  
5 hours per week or 20 hours per month equals 240 service hours per year per person.

b. 5 percent of the estimated 2,000 people who are DeafBlind, and not receiving services through Medicaid, will use SSP/CN services\(^\text{13}\) equates to 100 individuals served.

c. Calculation for annual cost of program is $528,000.

d. Administrative costs for the program (approximately 10 percent) are $56,400.

e. Total annual program cost is $584,400.

7. Establish the fee for service by rule to facilitate future changes.

8. Create an initial advisory committee to create the program, including individuals who are DeafBlind, SSPs/CNs, GCPD, and other organizations that serve individuals who are DeafBlind.

\(^{13}\) See methodology in Appendix C.
A BILL TO BE ENTITLED

AN ACT

Relating to establishing a pilot program for professional support service provider services for persons who are deaf-blind.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. Section 81.001, Human Resources Code, is amended by adding Subsection (6) to read as follows:

(6) "Support service provider" means a person who is specially trained to enable persons who are deaf-blind to access their environments and make informed decisions by providing visual and environmental information, sighted guide services, and communication accessibility in the person's preferred language and communication mode. Preferred communication modes include auditory amplification with a personal FM system, visible Signed English, visible American Sign Language, or tactile sign language. A support service provider does not provide personal care, run errands alone for, or make decisions for a person who is deaf-blind, teach or instruct a person who is deaf-blind, or interpret for a person who is deaf-blind in formal settings, such as medical, legal, or business appointments.
SECTION 2. Chapter 81, Human Resources Code, is amended by adding Section 81.002 to read as follows:

Sec. 81.022. Support Service Provider Program Pilot. (a) Out of funds provided for this program, the Department shall develop a pilot program for the provision of support service providers for persons who are deaf-blind.

(b) This pilot shall be located in two counties in the State where a significant deaf-blind population resides.

(c) The Department has the authority to develop rules to:

(1) administer the pilot program in a manner that balances maximum efficiency, serving the most people as possible, and how to best serve the deaf-blind community; and

(2) ensure those receiving compensation for service as a support service provider have a proper level of training.

(d) The Department shall establish a pay rate for the support service providers that utilizes a tiered wage scale based on a support service provider's:

(1) level of training;

(2) fluency in the deaf-blind person's preferred communication mode; and

(3) other skills in deaf-blind communication modalities.

(e) The agency shall begin planning for the implementation of this pilot during the year proceeding the starting date.
(f) This pilot is to begin September 1, 2018.

SECTION 3. This Act takes effect September 1, 2017.
From the 86th Texas Legislature, Regular Session, 2019

By: Watson  S.B. No. 704

A BILL TO BE ENTITLED

AN ACT

relating to the provision of certain support services to persons who are deaf-blind.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. Section 81.001, Human Resources Code, is amended by adding Subdivision (1) to read as follows:

(1) "Commission" means the Health and Human Services Commission.

SECTION 2. Chapter 81, Human Resources Code, is amended by adding Section 81.014 to read as follows:

Sec. 81.014. SUPPORT SERVICES PROGRAM FOR PERSONS WHO ARE DEAF-BLIND. (a) In this section:

(1) "Communication mode" includes communication through:

(A) auditory amplification, such as through a personal hearing aid or assistive listening device;

(B) American Sign Language or Signed English; and

(C) tactile American Sign Language.

(2) "Deaf-blind support services" means services provided to a person who is deaf-blind that assist the person with
accessing the person's environment and allow the person to make informed decisions. The term includes providing visual and environmental information or sighted guide services and assisting with communication accessibility by communicating in the preferred language and communication mode of the person who is deaf-blind. The term does not include performing any of the following for the person:

(A) providing personal care services to the person;

(B) completing ordinary errands for the person;

(C) making decisions for the person;

(D) teaching or otherwise instructing the person;

or

(E) interpreting for the person in a formal setting, including a medical, legal, or business setting.

(3) "Program" means the deaf-blind support services program.

(4) "Provider of deaf-blind support services" means a person who is specially trained to provide deaf-blind support services.

(b) The commission shall operate a statewide deaf-blind support services program through which:

(1) deaf-blind support services are provided by providers of deaf-blind support services; and
(2) the commission reimburses the providers for the provision of the services.

(c) The executive commissioner by rule shall establish reimbursement rates to be paid to a provider of deaf-blind support services under the program. The reimbursement rates must use a tiered wage scale that is based on the provider's:

(1) level of training in communication modes for persons who are deaf-blind and in sighted guide-mobility techniques; and

(2) fluency in communication modes for persons who are deaf-blind.

(d) The commission shall ensure that quality deaf-blind support services are provided under the program by:

(1) monitoring the compliance of providers of deaf-blind support services with program rules;

(2) developing funding sources for the program that are in addition to state sources and will reduce reliance on the state sources for continuation of the program; and

(3) providing funding and technical assistance for training programs for:

(A) providers of deaf-blind support services under the program; and

(B) persons who are deaf-blind to enable those persons to effectively use the services offered under the program.
(e) The executive commissioner may establish an advisory committee to advise the commission in developing and operating the program, including operating the program in a manner that ensures the efficient use of state money. Subject to Section 2110.002, Government Code, the executive commissioner shall determine the number of members serving on the advisory committee, which must include persons who are deaf-blind and other stakeholders.

(f) The executive commissioner may adopt rules necessary to:

(1) operate the program in a manner that is efficient and maximizes the number of persons served; and

(2) ensure that providers of deaf-blind support services receiving reimbursement under the program have adequate training to provide those services.

SECTION 3. Not later than September 1, 2020:

(1) the executive commissioner of the Health and Human Services Commission shall adopt rules necessary to implement Section 81.014, Human Resources Code, as added by this Act; and

(2) the commission shall begin operating the program required by that section.

SECTION 4. This Act takes effect September 1, 2019.
Appendix B: Service Roles within a Diverse Texas DeafBlind Community

DeafBlind adults want to navigate their environment, participate in their community, make autonomous decisions, and live independently with greater quality of life, safety, and community access.

There is a gap in existing services for the estimated 2,446 DeafBlind adult Texans, who face barriers in addressing basic needs such as shopping, running errands, reading mail, and safely traveling to and attending events, including business, and health services. Professional Support Service Providers (SSPs) fill the gaps that sign language interpreters and interveners do not cover.

People who are DeafBlind have a wide range of individualized needs, depending on the impact on their hearing and vision, onset of DeafBlindness, and communication modes used. DeafBlind children receive services while in school, and those with an additional disability can receive lifelong intervener services through a Medicaid waiver program. Language-proficient, autonomous DeafBlind adults living in their own homes are not eligible for these services.

Interpreters provide language access for certain scheduled events, but that alone does not create true access due to mobility and information-gathering barriers. SSPs cover a range of situations that sign language interpreters do not.

The chart below further highlights the varying roles of these three professions.

http://www.txssp.info.

Texas Governor’s Committee on People with Disabilities (2017) *A Report on Support Service Providers.* Austin, TX.
Appendix C: SSP/CN Program Participation Methodology

- HKNC has identified 2,446 people who are DeafBlind over the age of 18 in Texas. *Note: This number is an estimate. HKNC counts those individuals who register with them; the total population may be greater.*
- 362 individuals who are DeafBlind over the age of 18 receive services through the Medicaid DBMD Waiver.\(^\text{14}\)
- 85 individuals between the ages of 18 and 21 receive services through the Texas School for the Blind and Visually Impaired (TSBVI).\(^\text{15}\)
- The total number of people who are DeafBlind who could receive services from an SSP/CN program is 2,000.
- Assumptions:
  - An estimate of 5 percent to 10 percent of the total 2,000 individuals who are DeafBlind will participate in the SSP/CN program once it is established.
- Reasoning:
  - An analysis of the 30 states with an active SSP/CN program shows (from the states that were able to share the information) that between 5 percent and 10 percent of the state’s total DeafBlind population participate in the program.
    - Alabama: 5 percent
    - Arizona: 8 percent
    - Colorado: 3 percent
    - Massachusetts: 10 percent
    - New Jersey: 9 percent
- GCPD believes 5 percent of the Texas DeafBlind population, or 100 people, would participate in an SSP/CN program if one existed.
