Introduction

Demographic studies yield valuable information about the population within a specific geographic location. Household and persons' economic, social, and housing information of the different categories of the population are products of demographic studies. Understanding the diverse segments of the population is crucial for assessing the quality and quantity of human resources available for socio-economic development.

The Organization for Economic Co-operation and Development (OECD) stated in 2019 that a highly skilled workforce is essential for employers and the overall growth of the economy. It is important that adults engage in educational activities, not only by offering opportunities for those who seek them but also by proactively promoting broader participation. Delivering high-quality information, highlighting the benefits of AEL, and providing personalized advice and guidance can enhance overall participation and inclusivity (OECD, 2019).

The Texas Workforce Investment Council

The Texas Workforce Investment Council (Council) was created in 1993 by the 73rd Texas Legislature. As an advisory body to the Governor and the legislature, the Council assists with strategic planning for and evaluation of Texas' workforce system. The 19-member Council includes representatives from business, labor, education, community-based organizations, and the Council's five-member state agencies.

Statutory Directive

Under Title 10 Texas Government Code (TGC) Section 2308.101, the Council is responsible for promoting the development of a well-educated, highly skilled workforce for Texas and advocating the development of an integrated workforce system to provide quality workforce education and training to address the needs of employers and current and future workers in Texas.

The State Strategic Plan

The development of an integrated strategic plan for the workforce system is one of the Council's primary responsibilities. To sustain and increase economic growth, a well-trained labor supply must be available for employers seeking to establish, conduct, or expand business operations in Texas. As articulated in *Accelerating Alignment: Texas Workforce System Strategic Plan for Fiscal Years 2024–2031*, the Council's vision is a collaborative workforce system that drives economic prosperity for Texas and Texans. All Texans are part of the critical pool of potential employees that is and will be required by Texas employers. This includes Texas individuals eligible for Adult Education and Literacy (AEL) services in Texas.

Scope of Report

The Council prepared this report to detail the individuals eligible for AEL services in Texas. This report is an update to *Understanding the Need for Adult Education in Texas* which was last published in September 2018. The data presented in this report supersedes the data reported in the previous report. The Council further analyzed the current population in need of AEL services and examined the geographic dispersion of this need across local workforce development areas (LWDAs) in Texas. This report does not provide a detailed estimate of future service needs based on Texas population projections due to certain limitations.

Methodology

This study examines various characteristics of individuals eligible for AEL services in Texas, including their educational attainment and race/ethnicity. As with all research, the limitations associated with the data sources determine the specific types of analyses that can be conducted. Additionally, this study references and utilizes several technical concepts with specific definitions. This section details data sources, the data limitations, and the key concepts related to this research.

Data Sources

The primary data source used for this research is the U.S. Census 2022 American Community Survey (ACS). The ACS is an ongoing, yearly survey that samples a small percentage of the population. The sample responses are weighted to approximate the demographic characteristics of the entire population. ACS data are available in summary tables and Public Use Microdata Sample (PUMS) files. The microdata files use a smaller sample than the summary tables but can be used for custom analyses. In this report, microdata is used to analyze the state's eligible individuals for AEL services.

The five-year estimates are generally used to analyze smaller populations and geographies such as counties, census tracts, and census blocks (U.S. Census Bureau, 2020a; U.S. Census Bureau, 2020b). Eligible individuals for AEL services by counties were calculated by aligning allocation factors developed by the Missouri Census Data Center (2022a) with the respondents in the ACS geographic segments, which is known as Public Use Microdata Areas (PUMA) with Texas counties. The 2022 5-year ACS microdata has two different Public Use Microdata Areas (PUMA12 and PUMA22) allocated to the person's weighted survey response. Due to the geographical reallocation of population in the PUMAs, it is recommended to apply the Geocorr PUMA12 and PUMA22, respectively (Missouri Census Data Center, 2022b). Rounding may affect totals.

Data Processing

The findings from this report were processed through multifold data analyses from the aforementioned data source. The ACS PUMS (microdata) file is detailed with variables from not less than a million respondents. Therefore, the PUMS (microdata) file and MCDC data required some form of data transformation and variable categorization through data cleaning and modification. This more extensive data processing is illustrated in Appendix A.

Concepts

Adult Education is often applied as a broad reference for numerous and distinct types of adult learning activities. Individuals most in need of services or hardest to serve, including those with multiple barriers to educational enhancement, are considered eligible. For the purpose of the Council's work, the definition of *Adult Education and Literacy* is determined by Title II of the 2014 Workforce Innovation and Opportunity Act (WIOA), specifically the Adult Education and Family Literacy Act. WIOA defines adult education as academic instruction and education services below the postsecondary level that increase an eligible individual's ability to:

- read, write, and speak in English and perform mathematics or other activities that are necessary for the attainment of a secondary school diploma or its recognized equivalent,
- transition to postsecondary education and training, and
- obtain employment.

Under WIOA, an “eligible individual” is an individual:

- who is 16 years of age or older,
- who is not enrolled or required to be enrolled in secondary school under state law, and
- who:
 - is basic skills deficient;
 - does not have a secondary school diploma or its recognized equivalent, and has not achieved an equivalent level of education; or
 - is an English language learner.

AEL programs generally emphasize basic skills in reading, writing, math, and English language competency to prepare adults for jobs or further academic instruction. This definition, though somewhat narrowed by statutory parameters, provides a starting point for understanding the role of AEL in workforce development. A short discussion of the definition of AEL and its role within the workforce system is included in Council’s previous system plan, *The Texas Workforce System Strategic Plan FY 2016-FY 2023* (Texas Workforce Investment Council, 2015).

Data Issues and Limitations

The specific analyses that can be conducted are limited to the variables that are included in the datasets. Analyses may also be limited by a lack of available data for certain geographical boundaries. For example, even though the ACS microdata provide rich demographic data with variables assessing various individual characteristics, data are not available at the county level. Therefore, analyses cannot be conducted for counties using only the ACS microdata.

Unlike the decennial census, administered to the total population to determine accurate counts, the ACS and CPS are based on samples and produce data that approximate the size of the population. Since the surveys use different samples and methodologies, the data from each source is similar but does not exactly match. When possible, ACS data are referenced since a majority of the analyses in this report are based on that dataset.

Current Population in Need of Adult Education and Literacy

Understanding the current need for AEL services is critical to policy makers and practitioners in order to evaluate program effectiveness, design services, develop strategies, and make policy recommendations. This section describes the current Texas population in need of AEL services according to the eligibility definition in Title II of WIOA using data from the 2022 ACS 5-year PUMS. Results indicate that 20.7 percent of the Texas population over the age of 16 (4,700,115) met the federal definition and qualify for AEL services. The need for AEL services varies between racial and ethnic groups. Hispanics account for the largest percentages of individuals qualifying for services in all the educational attainment categories, while Whites accounted for the second largest percentage of English fluent individuals with less than a high school diploma, GED, or high school equivalency.

Defining Need

As discussed in the Introduction, the Council's definition of AEL is determined by Title II of WIOA. In this report, individuals who are not enrolled in secondary school, and who are at least 16 years old, are eligible for AEL services if they have not earned a high school diploma (GED or high school equivalency) or are unable to speak, read, or write English. Calculating the numbers of individuals in Texas that meet these eligibility requirements provides an idea of the current need for AEL services in the state.

Description of the Current Population

The ACS is a nationwide survey conducted by the Census Bureau since 2005. The ACS provides yearly demographic and socioeconomic data such as educational attainment, English fluency, and citizenship status. ACS replaced the decennial census long form in 2010 (U.S. Census Bureau, 2022). Survey results are statistically weighted to approximate the population of the state. The 2018–2022 multiyear estimates are based on data collected over five years and describe the average characteristics for that five-year period. For example, if the number of individuals who have not completed high school in an area was 2,000 each year from 2018 to 2021 and 5,000 in 2022, then the five-year (2018–2022) estimate would be 2,600. Compared to the one-year ACS estimates, the 2018–2022 ACS data is less current. However, the five-year estimates are more reliable since they are based on larger samples and include information from smaller geographic areas (U.S. Census Bureau, 2020a; U.S. Census Bureau, 2020b).

The 2022 ACS indicates that there were 22,700,002 individuals in Texas who were at least 16 years old. Approximately 21 percent (4,700,115) are qualified for AEL services because they were not English fluent and/or did not have at least a high school diploma, GED, or high school equivalency. Looking specifically at the group of individuals traditionally considered as prime working age, that is, between the ages of 16 and 64, 17.3 percent, or a total of 3,917,473 individuals, qualified for AEL services.

Table 1 presents the numbers of individuals eligible for AEL services in Texas by nativity, fluency, and educational attainment. Information is provided for everyone who is at least 16 years old and for individuals between 16 and 64 years old. Sixty-three percent (2,961,455) of the 4,700,115 adults over 16 who are eligible for AEL services are English fluent and have less than a high school diploma.

This table also indicates that approximately 37 percent (1,738,660) of Texans eligible for AEL services are unable to speak English. To understand the percentage of adult English language learners, we need to consider an individual's nativity status. Almost 33 percent (1,559,329) of individuals over the age of 16 who qualify for AEL services in Texas are non-English fluent and foreign-born. These individuals in need of English literacy skills do not necessarily lack basic educational skills, although that is often the case. About 38 percent (652,213) of Texans over 16 who are eligible for AEL services have a high school diploma, GED, or an equivalent qualification. Some may have attained a higher level of education but still do not speak English well. For example, an immigrant may have a college degree from his or her home country but is not able to communicate fluently in English. This individual is therefore literate and educated in his or her native language. The AEL services required by this individual would be very different compared to the services required by a native or foreign-born individual who did not graduate high school and is unable to speak English. Providing English language skills to these individuals with higher educational attainment could empower them to achieve fluency necessary to find a job in which they can utilize their education.

Table 1 illustrates that the greatest number in need of AEL is not those who do not speak or read English well. Rather, the greatest need is in the 2,961,455 individuals who are English fluent but only have an education level ranging from 0 to 4th, 5th to 8th or 9th to 12th grade.

Table 1: Individuals Eligible for AEL Services in Texas by Nativity, Fluency, and Educational Attainment, 2022

Educational Attainment	English Fluent		Not English Fluent				Total

Table Notes: This table presents information for everyone over the age of 16 who qualifies for AEL and the subset of individuals who are between 16 and 64. Percentages represent individuals in each column. Asterisks indicate placeholders since English fluent individuals who have at least graduated high school do not qualify for AEL. Individuals are not English fluent if they report speaking English “not well” or “not at all.”

Source: 2022 ACS PUMS (microdata).

*For comparison of current and previous report data, please see Appendix C.

Texas' population in need of AEL has decreased since the previous report. As a whole, this population slightly decreased by a hundred thousand people—from 4,807,600 in 2018 to 4,700,115 in 2024. The slight decrease comes from individuals who are English fluent and not English fluent who are foreign born. Analysis performed by educational attainment, fluency, and nativity for individuals eligible for AEL was compiled using data from the 2018 report and Table 1. A comparison of data from the previous and new reports is included in Appendix C.

To obtain more details about the population in need of AEL services, race and ethnicity were analyzed. Table 2 illustrates the numbers and percentages of individuals in each educational attainment category by race, nativity, and English fluency. Hispanics account for the largest percentage of individuals who qualify for services in all the educational attainment categories by both nativity and fluency. Whites account for the second largest percentage (793,339) of English fluent individuals with less than a high school diploma. Asians, the fastest growing race in Texas, account for the second largest percentage (150,030) of not English-fluent who are foreign born.

Table 2: Individuals Eligible for AEL Services in Texas by Nativity, Fluency, Race and Educational Attainment, 2022

Table Notes: 2022 ACS PUMS (microdata).

Highly Skilled Foreign Born Individuals Eligible for Adult Education and Literacy Services

English fluency is a major component of AEL in Texas. These individuals in need of English literacy skills do not necessarily lack basic education. A total of 652,213 were unable to speak English but had an education at or above the high school graduate level, GED, or equivalent. This report considered the status of nativity or where these individuals were born. The native born who are not English fluent account for a small percentage of all individuals who are not English fluent.

This section focuses on foreign born individuals who are not fluent in English but have attained a bachelor's degree or higher. As of 2014, 4,497,584 Texans (17 percent) were foreign born, compared to more than 13 percent of the U.S. population (New American Economy, 2016). Roughly one in six Texans was foreign born, which was the same for the labor force. Texas has a thriving economy and a growing number of highly skilled jobs; therefore, the state has a continuous need for highly skilled workers to meet this demand. Foreign born individuals account for 21.8 percent (3,185,450) of the Texas civilian labor force in 2022. Thus, one in five Texans in the civilian labor force in 2022 was foreign born.

Individuals with a bachelor's degree or higher who graduated from a four-year baccalaureate degree are categorized as highly skilled. This section focuses on highly skilled foreign born who are most likely from other countries and whose first language is not English. The previous tables provided some basic information about this category of individuals. Table 1 indicates that there are 103,041 individuals within this category eligible for AEL services in Texas. Table 2 illustrates that 67 percent of these individuals are Hispanics, 25 percent are Asians, and six percent are Whites. More details about this category of individuals are provided in this section.

Figure 1 illustrates the highly skilled foreign born individuals who are not fluent in English by age category and gender. About 80 percent of males and females are within the working age category (16 to 64). Approximately 45 percent and 46 percent of males and females, respectively, are within the age of 35 to 54 years. Whereas 16.3 percent and 21.9 percent of males and females, respectively, are between the ages of 16 to 34 years.

Figure 1: Highly Skilled Foreign Born Individuals Eligible for AEL Services in Texas by Age Category and Gender, 2022

Figure Notes: 2022 ACS PUMS (microdata).

Table 3 illustrates the participation of highly skilled foreign born individuals in the civilian labor force who are not fluent in English by age category. Approximately 58 percent (59,457) of these individuals are labor force participants, and 43,584 (42 percent) are not labor force participants. Approximately 94 percent of the employed individuals are within the working age (16 to 64). More than half (54 percent) are between the ages of 35 to 54 years old.

Table 3: Labor Force Participation of Highly Skilled Foreign Born Individuals Eligible for AEL Services in Texas, 2022

Age Category	Not in Labor Force		Labor Force Participants			
	Number	Percent	Employed		Unemployed	
			Number	Percent	Number	Percent
16 to 34 years	8,546	19.6%	10,873	19.5%	718	20.0%
35 to 54 years	14,255	32.7%	30,511	54.6%	2,165	60.4%
55 to 64 years	6,493	14.9%	10,818	19.4%	628	17.5%
65 to 74 years	8,150	18.7%	3,143	5.6%	60	1.7%

Table Notes: 2022 ACS PUMS (microdata).

Table 4 assessed the top 20 occupations that employed highly skilled foreign born individuals who are not English fluent in 2022. Approximately 40 percent of these individuals who are labor force participants in Texas held one of these 20 positions. Approximately four percent (2,252) were employed as driver/sales workers and truck drivers, followed by a total of 1,821 individuals (3.1 percent) employed as cooks and 1,679 individuals (2.8 percent) employed as construction laborers.

Table 4: Top 20 Occupations of Highly Skilled Foreign Born Individuals Eligible for AEL Services in Texas, 2022

Geographic Distribution of Current Need for Adult Education and Literacy in Texas

As part of the Council's standard approach to demographic research, the geographic distribution of population segments is calculated and represented on a map. This section details the number of individuals aged 16 and older who qualify for AEL in each of the 28 local workforce development areas (LWDA).

The 28 Local Workforce Development Areas

Under Title 10 TGC Sections 2308.1015 and 2308.1016, the Council is responsible for facilitating the delivery of integrated workforce services and the efficient delivery of integrated AEL services in Texas. To assist workforce system partners and stakeholders in coordinating program planning and delivery and in designing integrated services, the Council identified the 28 LWDAs to analyze the geographic distribution of current populations needing AEL services. These geographic regions are well-established among system partners and stakeholders, serving as the boundaries within which funding is allocated for various workforce programs and initiatives.

Figure 2 shows the 28 LWDAs across the state. Map A displays the total number of individuals eligible for services, while Map B illustrates the rate of eligibility. The eligibility rate for AEL services in each LWDA was determined by dividing the total population (denominator) by the number of eligible individuals (numerator), specifically for those aged 16 years and older.

Over 1.2 million Texans in the Gulf Coast area are eligible for AEL services. Gulf Coast has the highest number of individuals followed by Greater Dallas (514,430), Alamo (396,467), and North Central Texas (334,467) as shown by the darker purple on the map. Map B offers a different perspective to help system partners identify LWDAs with a high percentage of adults eligible for AEL services. About 40 percent of Texans 16 years and over in Lower Rio Grande Valley, South Texas, Middle Rio Grande, and Cameron are eligible for AEL services. Thus, for every 10 adults 16 years and over, four are eligible for AEL services in these LWDAs.

Figure 2: Individuals Eligible for AEL Services in Texas by LWDA, 2022

Source: U.S. Census Bureau, 2022

Summary Table of the Geographic Distribution of Current Need

This table includes detail by nativity, fluency, and educational attainment. Table 6 summarizes the total numbers of individuals eligible for AEL services in each LWDA. Gulf Coast has the highest percentages of individuals in all three categories (English fluent; not English fluent-native born; and not English fluent-foreign born) followed by Greater Dallas, North Central, and Alamo. Appendix B presents the numbers of individuals over the age of 16 eligible for AEL services broken down into each LWDA.

Table 6: Individuals Eligible for AEL Services in Texas by LWDA, 2022

Highly Skilled Foreign Born Individuals Eligible for Adult Education and Literacy Services by LWDA, 2022

This section provides more information about individuals in need of English literacy skills but who have attained a high level of education in every LWDA in Texas to complement the information provided in Figure 1 and Tables 3, 4, and 5. Over a hundred thousand foreign born individuals with bachelor’s degrees who are not English fluent are eligible for AEL services in Texas. This section details the geographic distribution of these individuals by LWDA.

Figure 3 shows that highly skilled foreign born individuals who are not English fluent are more located in the workforce boards in areas such as the Houston metro area, San Antonio-New Braunfels, Austin-Round Rock, and Dallas Fort Worth metro areas. The Gulf Coast accounts for the highest number of these individuals with 34,612 (33.6 percent), followed by Greater Dallas with 11,988 (11.6 percent), North Central Texas with 10,471 (10.2 percent), Lower Rio Grande Valley with 7,298 (7.1 percent), and Alamo with 6,468 (6.3 percent).

Concluding Comments

This study estimates the number of individuals eligible for AEL services in Texas. A thorough analysis was conducted to assess the current population in need of these services, with a specific focus on foreign born individuals who are not fluent in English but have obtained a bachelor's degree or higher. Additionally, the study includes information on the geographic distribution of the current demand for AEL services in Texas. This estimation was based on the 2022 American Community Survey (ACS) 5-Year Public Use Microdata Sample (PUMS).

The 2022 ACS reports that there are 22,700,002 Texans aged 16 and older. Among them, 4,700,115 individuals currently require AEL services. This figure marks a slight decline from the 4,807,600 Texans estimated in the 2018 report. Hispanics constitute the largest racial and ethnic group eligible for adult education services across all educational attainment categories, regardless of nativity or language fluency. Whites are the second largest group among Texans who are fluent in English but have not completed high school. Additionally, just over 100,000 foreign born Texans, who are not English fluent and possess a bachelor's degree or higher, also qualify for AEL services. A significant percentage of these individuals, both male and female, are within the working age range of 16 to 64 years old.

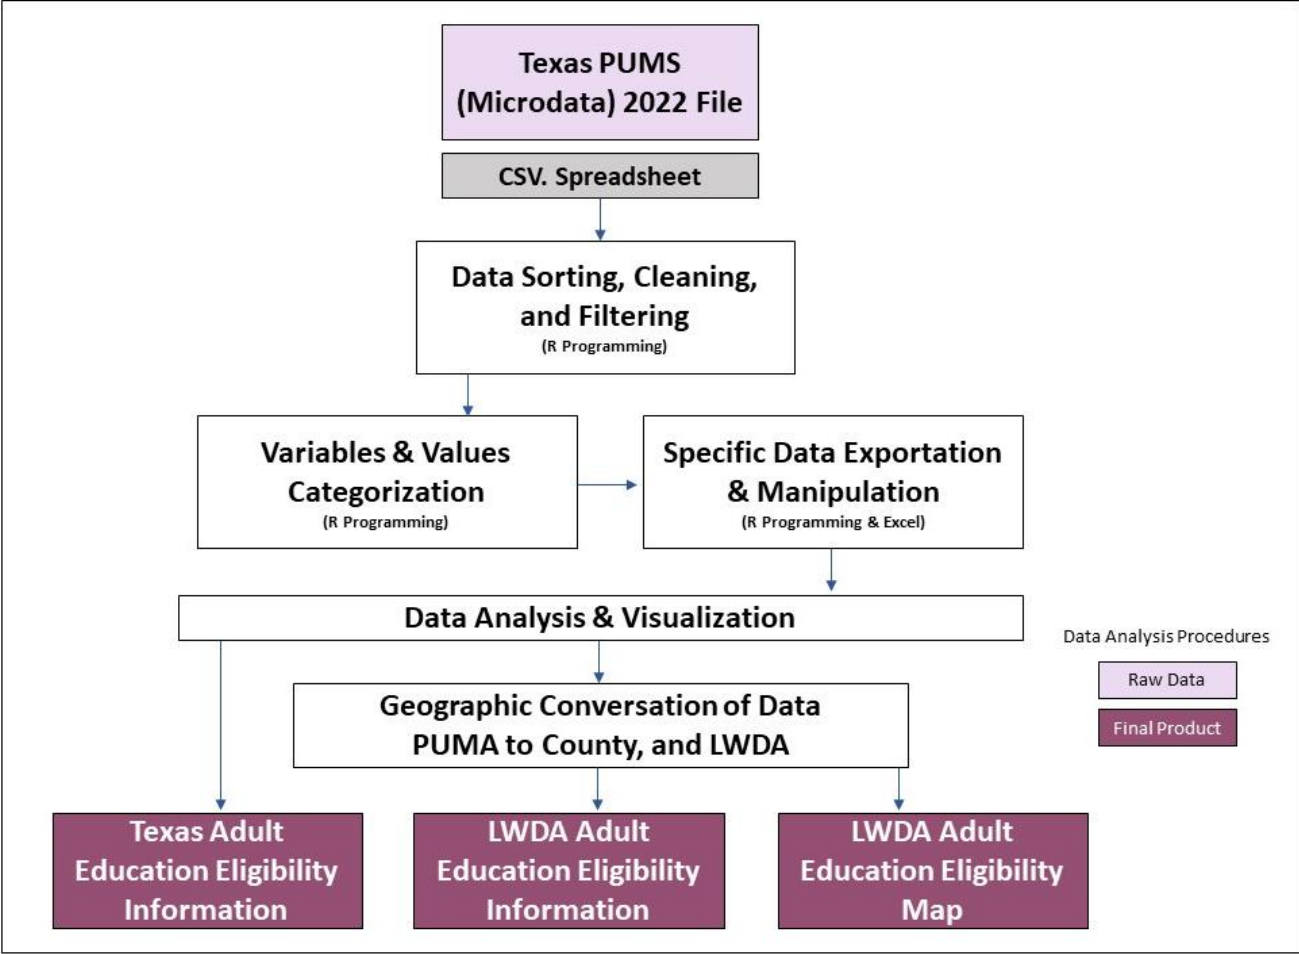

The geographic distribution outlined in this report aims to help workforce system partners and stakeholders coordinate program planning and delivery, as well as design integrated services. The Gulf Coast region has the highest number of Texans eligible for AEL services, totaling over 1.2 million individuals, which represents approximately 27 percent of all eligible Texans. This is followed by the Dallas and Alamo local board areas.

This report offers a more comprehensive and authoritative determination of the current populations in need of AEL services in Texas. Texas has a robust economy and a demand for skilled jobs. However, there is a constant need for a highly skilled workforce to meet the ongoing demands of the modern digital economy. Hence, this research can assist policy makers and program administration develop or modify policy and service delivery strategies.

Appendix A: Data Processing Framework

Appendix B: Current Need for AEL by LWDA

This appendix presents the numbers of individuals over the age of 16 who qualify for AEL by each LWDA. The numbers were calculated using the American Community Survey 2022 five-year estimates. The five-year estimates describe the average social, economic, and demographic characteristics for the five-year period between 2018 and 2022. Individuals are not English fluent if they report speaking English “not well” or “not at all.” Percentages represent individuals in each column. The asterisks in each table are placeholders since English fluent individuals who have at least graduated high school do not qualify for AEL.

Appendix C: Comparative Data

This appendix presents comparative data on individuals eligible for AEL services in Texas. A comparative analysis was conducted by evaluating data from current and previous reports. The data in the following tables serves as a guide for understanding the significant growth of the population in need of AEL. Tables 35-38 present the numbers of individuals eligible for AEL services in Texas by nativity, fluency, and educational attainment. Data is provided for everyone who is at least 16 years old and for individuals between 16 and 64 years old. Finally, each table includes calculations corresponding to percent change.

Comparison of Individuals Eligible for AEL Services in Texas by Nativity, Fluency, and Educational Attainment (2018 and 2024)
